

10FT FINISHER

Performance

The target of this game is to see how many putts it takes you to hole 10 x 10ft putts. Start by choosing a random 10ft putt, then go through your full routine and attempt to hole it.

If you do so successfully, that is one in the bank.

Once you have hit the first putt, you must choose another 10ft putt and repeat the process. Continue this process until you have 10 putts.

Your score will be the amount of attempts it takes you.
