GO LONG
Performance

This game is designed to test your ability to strike your long irons solidly and online! There are a number of ways that this can be completed:

1)   Simply visualising or imagining the target
2)   Choose a target that is approximately the width of a green
3)   Using a launch monitor / simulator to measure the distance right or left that the ball will miss by, lets estimate that the average green has 30ft Right & Left of centre.

The premise is simple, choose a level from below to begin, and count how many balls it takes you to hit the green that many times. The ball must be struck well and also achieve the directional goal that you have set out.

Level 1 = 3 shots on the green
Level 2 = 7 shots on the green
Level 3 = 10 shots on the green
Level 4 = 7 in a row on the green
