

PAR 18 BAD BALL Performance

You will play 9 random holes on the chipping green using 2 balls. These 9 shots should include 3 chip shots, 3 pitch shots and 3 bunker shots.

Each hole you play you must hit both balls from the same place and choose the worst one.

Once you have done this you must hit two putts from that point and again choose your worst. Each ball should be played to completion meaning you will play each shot twice and putt the ball into the hole twice.

Your score will be the total number of individual shots taken to complete all 9 holes.
