

GRADES Performance

Grades is a great way to test and develop your ability to control the flight and spin of your pitch shots around the green.

You will need 21 golf balls to complete this game.

To begin place 3 golf balls every metre from the edge of the green between 1 metre and 7 metres away. This should mean that there is total of 7 stations of 3 golf balls.

The goal is to simply get 1 ball from each station inside 1 club length of the hole. If you successfully get a golf ball from station 1 inside 1 club length, then move to station two immediately. Repeat until all 7 stations are complete.

If at any station you do not get 1 out of 3 balls inside a club length, reset the balls and return to the start.

Your score will be measured in how many total shots it takes you to complete the task. If at any point you fail to complete a station and you return to the start, those shots will also be added to your total score.
