

LIGHTS OUT

Performance

Ideally this game will be played using a launch monitor for accuracy, however if you do not have one you can estimate the distances relative to the target.

You will see below we have a grid of 16 tasks. These tasks vary from drives to putts. What those tasks are will be completely up to you based on what You have conveniently available at your facility.

The goal is simply to cross off as many boxes as possible within a 1 hour time limit. Each box will have two tasks within it that must be completed in succession, and if one task is missed another box must be attempted.

The box that has been missed cannot be attempted until at least Two other boxes have been attempted.

Your score will be how many boxes you successfully complete

Drive
&
106y Approach

3 Iron / Hybrid
&
45ft (2 putt)

Drive
&
Hole a 6ft Putt

150y Approach
&
10ft Putt
