

MIDDLE DISTANCE Performance

The goal of this game is to test a variety of difficult shots around the green, and also your ability to reproduce shots on command.

To complete this game you must choose 9 different and difficult short game shots to play.

You will play 3 shots from each location and measure the ball that ends up being the “middle distance” ball from the hole. That is not the nearest, and not the furthest from the hole.

Your score will be the total accumulated distance from the hole of each “Middle Distance” golf ball.
